Telsonic, a leading Swiss manufacturer of ultrasonic systems, has been honored by the Swiss Institute for Quality Tests (SIQT) as one of the most innovative mid-sized companies in Switzerland for 2023/24. In the field of electrical engineering, Telsonic achieved an outstanding 7th place.

The SIQT Innovation Award recognizes companies with an annual turnover of less than CHF 1 billion to honor the innovation strength of Swiss mid-sized enterprises. As an objective evaluation basis, all patent grants for Swiss companies within the period from January 1, 2021, to April 30, 2023, were considered. The research encompassed patent offices worldwide and additionally considered citation frequency as a qualitative component.

Telsonic owes this recognition to its significant investments in the development of ultrasonic systems in recent years. These efforts have enabled the company to discover novel approaches and create innovative technologies applicable in numerous industries.

Additionally, Telsonic has digitized its product range for customers and made it accessible under the name «Telso@Assist.» Through this digitalization initiative, the company can offer efficient support and optimized solutions tailored to its customers' needs.

The management of Telsonic expresses pride in receiving the award and considers it recognition for the dedication and innovative spirit

of the entire team. They emphasize that continuous investments in research and development, as well as a focus on product and service digitalization, have been crucial contributors to their success.

«Our team at Telsonic is highly motivated and committed to developing innovative solutions for our customers. This award is a testament to our efforts to establish ourselves among the industry's leading companies,» said Dr. Axel Vietze, CEO of Telsonic.

Telsonic feels encouraged by this recognition to continue investing in the development of new technologies and offering its customers first-class products and services in the future.

**About Telsonic:** Telsonic is a leading manufacturer of high-quality ultrasonic solutions for various industries. With over 55 years of experience and a dedicated team of experts, Telsonic strives to develop innovative technologies that meet its customers' requirements.

**About the SIQT Innovation Award:** The SIQT Innovation Award honors the most innovative mid-sized companies in Switzerland and uses patents as an objective measure of innovation.
